CAREER OBJECTIVE

A passionate and detail-oriented Computer Science graduate from AIUB with hands-on experience in web development, particularly in backend technologies like Laravel, PHP, and MySQL. With an internship experience in a fast-paced professional environment, I am eager to contribute to impactful software solutions that blend efficiency and innovation. I aim to join a dynamic development team where I can continue to grow my technical skills, contribute to real-world projects, and stay aligned with emerging technologies while building scalable, secure, and user-friendly applications.

EDUCATION

American International University-Bangladesh   10.2020 - 02.2025
Bachelor's Degree | Computer Science and Engineering
- CGPA: 3.61

Cambrian School and College   08.2017 - 07.2019
Higher Secondary School Certificate (HSC) | Science
- GPA: 3.17

Cambrian School and College   01.2015 – 02.2017
Secondary School Certificate (SSC) | Science
- GPA: 5.00

SKILLS & COMPETENCIES

- **Programming Languages:** PHP, C++, JavaScript, Java, C#, Python
- **Web Technologies:** HTML, CSS (Tailwind, Bootstrap, DaisyUI), JavaScript, jQuery, AJAX
- **Frameworks/Back-End:** Laravel, ASP.NET MVC, ASP.NET Core
- **Databases:** MySQL, phpMyAdmin, SQL Server Management Studio
- **APIs & Libraries:** Postman, Assembly AI, ChatGPT
- **Tools & IDEs:** Git, Visual Studio Code, Visual Studio, Jupyter Notebook, Laragon
- **Operating Systems:** Proficient in Windows and Linux
- **Soft Skills:** Effective communication, Endurance, Willingness to learn, Cognitive thinking, Collaboration and teamwork, Time management, Problem solving.

WORK EXPERIENCE

Software Engineering Intern

Orange Business Development Ltd. | Feb 2025 - Apr 2025

Worked in the Web Development team focusing on backend development using Laravel and MySQL.

Contributed to some API development, CRUD operations, migrations, Resource, Request, Mark-down Mail, job Queue and testing for the 'Sanvee's by Tony' project.

Used tools like Postman for testing API and Laragon for local environment setup.

Improved team collaboration and real-world problem-solving skills

Technologies: PHP, Laravel, MySQL, Laragon, VS Code, Git, Postman API

PROJECTS

Hospital Management System

The Hospital Management System serves four key user roles: Doctors, Patients, Administrators, and Staff. It enables Doctors to manage patient records, appointments, prescriptions, billing, and communication. Patients can access reports, book services, make payments, and provide feedback. Administrators (Admin) oversee profiles, approvals, complaints, and salaries, ensuring security
 and privacy. Staff handle scheduling, communication, inventory, and order processing efficiently.

Technologies: PHP, JavaScript, HTML, CSS, Ajax, phpMyAdmin

ASP.NET Core Web API & MVC Employee Management System

The ASP.NET Core Employee Management System is a full-stack project featuring a Web API for user authentication with ASP.NET Core Identity and an MVC client app. It implements the Repository Pattern, handles database operations with EF Core and Dapper, and uses jQuery with AJAX for frontend interactions. It supports CRUD operations and real API integration for product listings.

Technologies: ASP .NET Core Web-API, ASP .NET Core MVC, Entity Framework, Identity, Repository Pattern, jQuery, Dapper, Ajax, SQL Server, C#

AWARDS & ACCOMPLISHMENTS

- Cisco IT Essentials course certificate   04.2021

INTEREST

- Passionate about applying machine learning to real-world issues and solving complex problems innovatively
